

TDR-01-AC

6 POSITION REAR CONNECT POWERED RACK FOR TD SERIES

Overview

Complementing the flexibility of the FiberPlex 'TD Series' of fiber optic modules, the TDR-01-AC provides mounting, power and cable management for up to 6 modules in a compact and rugged aluminum 1U rack. With the TD modules rear facing, connections to the TD units are made from the rear, inside of the rack enclosure. The integrated key-hole mounting holes on the bottom the TD units lock securely on mating studs while a rear retention bar holds them securely in place. A 6 position wiring harness and included power adapter provide, not just 9 VDC power, but a positive earth ground to the modules via 3 position Phoenix™ locking power connectors. Managing all that cabling and fiber can sometimes be quite a chore so an extended cabling tray with integrated tie down points are provided to help make your installation clean.

TD Modules not included

Features:

- Provides mounting and power for up to 6 TD Series modules
- Rear facing modules to facilitate connection inside rack
- Securely seats modules with positive retention bar
- Power adapter and wiring harness included
- Convenient cable tray for clean installation
- Grounding stud for positive earth ground
- Reinforced rack ears

Applications:

- Datacom
- Broadcast
- SCADA
- A/V Installations
- Mobile Studio

For use with all TD Series modules
